

# Case Study

## AD Bly Construction

### Introduction

AD Bly Construction has built an enviable reputation over 25 years in the residential, retail and commercial sectors. Their fleet consists of 166 vehicles with a mix of cars, vans and HGV's.

### Challenges

AD Bly have always been aware of how important it is to keep on top of their fleet, particularly as the business depends so heavily on its vehicles. Prior to using FleetCheck, they were managing the day to day fleet tasks through outdated, unprofessional paper-based systems and spreadsheets meaning they had no audit trail of maintenance and fuel costs.

### How FleetCheck Helped

AD Bly Construction implemented FleetCheck's fleet management software around the same time as finding their telematics supplier. The combination of the two has resulted in many benefits, most significantly:

Integrating the data provided from their telematics into their FleetCheck means their vehicle mileages are now imported directly into their account, resulting in no more manual mileage checks, and avoidance of excess mileage charges.

AD Bly now has complete control of all vehicle and driver related activity, so all paper-based processes have been eliminated.

A significant amount of administration time has been saved using FleetCheck. As Adam Gamlin, AD Bly's transport manager, explains, "With the system and walk around app in place to handle our fleet management, it means we're up to date with the latest compliance policies, helping us to be recognised for excellent operational standards by Van Excellence."

## **Results and ROI**

Since moving to FleetCheck, AD Bly Construction have complete confidence that their fleet is properly managed, their processes are legally compliant, their costs are monitored, and their drivers are safe. Adam has total control over daily driver and vehicle activity, and thanks to FleetCheck's intuitive dashboard, he can closely monitor his fuel and maintenance spends across the fleet saving them time and money.

When asked to summarise his overall experience of FleetCheck, Adam comments, "Our original reason for seeking a fleet management solution was to find an easier way to remain compliant with Van Excellence, which the software has really helped us with.

"Once we had gone through the set-up process of getting our historical documents loaded into the system, it was clear how much time and money we were going to save."

Adam concludes, "FleetCheck has revolutionised our fleet by bringing in 21st century software that allows us to keep up to date with the current compliance requirements. I have confidently recommended it to others."
